

HARNESSING CHILDHOOD POTENTIAL THROUGH COMMUNITY-BASED COLLABORATIONS

WHAT IS THE 'CHILDREN'S PROMISE' GRANTS PROGRAMME?

The 'Children's Promise' grants programme is a new programme within Katharine Howard Foundation (KHF), an independent foundation focused on improving the lives of young children and their families living in disadvantaged circumstances. The programme is a collaboration with Community Foundation Ireland.

AIM OF THE GRANTS PROGRAMME

The 'Children's Promise' grants programme aims to support community-based organisations working with young children¹ and their families in disadvantaged areas, who may not reach their potential due to the corrosive impact of poverty.

This is necessary because despite Ireland being a prosperous, developed country, an estimated 89,288 children live in consistent poverty². All children are born with the potential to thrive and the 'Children's Promise' grants programme aims to support community-based organisations working to protect that potential and to support the wellbeing of their families.

The 'Children's Promise' grants programme is a promise from KHF to provide financial and other supports to selected organisations, to support and develop the potential of the children engaged with the organisations. The 'Children's Promise' grants programme aims to build on the powerful work taking place at community-level to address child poverty with a grants programme of €1,000,000 in financial and non-financial supports over the duration of the programme 2023-27.

CRITERIA

Eligible organisations will	Eligible projects/programmes will
<ul style="list-style-type: none">• Be a child or family-focused, community-based organisation working at local level.• Be a registered charity or a company limited by guarantee (CLG)³ – or apply in collaboration with a 'Lead partner' that is a registered charity or a CLG.• Have an annual income of less than €2,000,000.• Have up to date and sufficient governing documents, annual accounts and child safeguarding policies.	<ul style="list-style-type: none">• Support young children ages 0-5 and may include children up to 12 years of age, their parents (or guardians) and be from socio-economically disadvantaged backgrounds.• Address essential needs, creativity and play, education, or improved health and wellbeing for young children and their parents.• Be a new project or a promising current project that requires additional funding.• Use the funding for project costs such as staffing, planning, events, courses or for operational costs such as minor refurbishment, day-to-day running costs (which may have increased).

¹ Young children is defined here as in the 0-5 age range. However, organisations may support children of primary school age, in addition to those in the 0-5 age range.

² [Survey on Income and Living Conditions \(SILC\) 2022](#). Accessed 29th of March 2023.

³ DEIS primary schools may apply in partnership with a service that focuses on early years services (0-5 years).

ABOUT KATHARINE HOWARD FOUNDATION

Katharine Howard Foundation has supported organisations focused on addressing child poverty since 1979, mainly through investment in community-based programmes focused on 'prevention and early intervention' initiatives, early years childcare and education, or parenting support programmes.

It has also supported research into areas where there may be service 'gaps' or 'needs', in recognition of the fact that it can be difficult to secure funding to generate and capture evidence on local or regional needs.

Katharine Howard Foundation has a strong ethos of working in collaboration with other funders and statutory bodies and with community-based programmes. Our aim is to encourage the best outcomes for programmes, reduce duplication and ensure there is collective, shared learning and understanding.

PRIORITY AREAS FOR THE 'CHILDREN'S PROMISE' GRANT PROGRAMME

This grants programme focuses on 'promising projects and practices' within community-based organisations, which aim to prevent or intervene at an early stage in addressing the potential impact of poverty on young children and their families. It encourages applications from small, collaborative projects that focus on gaps in provision and innovative approaches to addressing these gaps.

Applications are particularly welcome from rural and urban organisations supporting disadvantaged groups such as Lone Parent families, Traveller families, families of prisoners, families of people suffering with addictions, Migrants and Asylum Seekers, displaced and homeless families, and families who have been affected by domestic and gender-based violence or other issues.

While there is no one 'magic bullet' to address the impact of poverty on children and families, we know that a number of factors can mitigate and positively support families and therefore children. We know that interventions that:

- **Support parents from the earliest stage possible**, preferably during pregnancy, can have greater impacts.
- **Support and enhance parent child relationships and responsive parenting**, through relational working, are essential in promoting better outcomes for children.
- **Help ameliorate the impact of stress experienced by families** through a range of either concrete and practical supports or more emotional and psychological supports lay the foundations for positive child outcomes.

Promising projects or practices that draw from the above principles and are supported by evidence can make a difference to the lives of children and their families. Many such projects and practices have been developed at the community level and are led by community and voluntary organisations, often with limited funding or resources.

CATEGORIES

The 'Children's Promise' grants programme will support organisations in the following categories:

- A. Early years / young children projects**, within community-based settings. These projects may also include children of primary school age.
- B. Parental support programmes.**
- C. Research** into promising programmes or gaps in provision that may help to build policy support in those areas.
- D. Capacity building** within your organisation (focused on young children aged 0-5), which may focus on creating an enabling environment for policy change, strengthening leadership capacity, strengthening your evidence-base or improving your standards of practice.

SUCCESSFUL PROJECTS ARE LIKELY TO INCLUDE:

- **A focus** on young children living in socio-economically disadvantaged areas.
- **An evidence-informed approach**, which shows the need for the project.
- **Integration** with other voluntary or statutory services in the community in both planning and delivery (E.g. CYPSCs / CFSN / Healthy Communities / LCDC).
- **Consultation with parents in identifying needs** and participation of parents in project planning, delivery and review.
- **Strategic benefit** of project to parents, organisation and wider community.
- **Sustainability** of the work – how will the benefits of this project be maintained in the organisation?
- **Success criteria** and a strategy for monitoring success and managing risk.

FUNDING LEVELS

The 'Children's Promise' grants programme offers grants of up to €45,000 (€15,000 per annum over a three-year period) to small, not-for-profit organisations with an annual turnover of less than €2,000,000. Each of the years 2023-2025, approximately four projects will be selected for multi-year support and six projects will be offered once-off support (of between €5,000 and €10,000).

The following categories of grants will be offered:

- €5,000 (once-off support in one year, with the option of additional non-financial supports).
- €10,000 (once-off support in one year, with the option of additional non-financial supports).
- Between €10,000 and €15,000 per annum (maximum of 3-year support and additional non-financial supports).

Organisations may apply for either a one-year grant of a minimum of €5,000 to a maximum of €10,000 or a multi-year grant of €15,000 per annum up to a maximum of three years. Organisations that apply for a one-year grant this year, may apply for another one-year grant or a multi-year grant next year. The grants programme will open for applications in the Spring of 2023, 2024 and 2025. These categories of support are further explained below.

CATEGORIES OF FUNDING SUPPORT

ONCE-OFF SUPPORT (€5,000 TO €10,000)	3-YEAR SUPPORT (€10,000 TO €15,000 EACH YEAR FOR A 3-YEAR PERIOD)
<p>This funding may address gaps in the cost of the day-to-day needs in operating your service. This could be minor refurbishment to improve the insulation or other elements, that may result in environmental improvements, new equipment, an outdoor play area or addressing a waiting list your service has developed (e.g. for therapeutic supports or similar) by paying for additional support hours. Grants will not normally support rent or utility costs.</p> <p>This funding could also be used to undertake a more strategic piece of work within your organisation, such as creating a stronger evidence-base from your work, to give you a better chance of securing continued or new support from other sources.</p>	<p>This support is an opportunity to sustain and further develop an existing programme you have, which requires expanded resources, or to develop a new programme to address a gap that you have identified. We are conscious that developing a new programme with a 3-year funding horizon can present sustainability challenges and we would like you to give this some thought in completing your application. We will also partner with you, as a selected organisation, to identify and try to address your sustainability challenges.</p>

NON-FINANCIAL SUPPORTS

Katharine Howard Foundation believes in partnering with organisations, in addition to providing funding. We know that many programmes are run on tight resources, with committed staff and we want to help you to build your capabilities as an organisation and to aim for 'realistic' change. We know this won't always be linear and there will be challenges along the way. Therefore, both the one-year and multi-year programmes that are selected for the 'Children's Promise' grants programme will be offered non-financial supports, such as participation in a learning network with other grantees, strategic planning, help with building an evidence base and sustainability advice.

COLLABORATIVE PROJECTS

The 'Children's Promise' grants programme will support organisations who apply on their own and those who apply with other organisations. If you are applying as a collaborative project, one organisation should be the 'lead' project and undertake to complete the online application. The 'lead' organisation must be able to provide a registered charity number. DEIS primary schools may apply if they are collaborating with an early years service (0-5) in their community.

You are encouraged to make clear how you collaborate with other statutory or voluntary organisations in your area and how the project will strengthen these connections. Documentation regarding annual accounts, governance arrangements and child safeguarding policies should be uploaded for each organisation. Collaborative projects will not exceed the maximum budget of €15,000 per annum in total.

OTHER FUNDERS

We want to hear about your other funders. This is because we know it can be difficult to be sustainable with funding from one source alone. It also means we may be able to help you to continue or to grow your funding relationships while we are working with you. If your project combines our funding with other funding, that is okay for us.

APPLICATION PERIOD

The 'Children's Promise' grants programme 2023 will accept applications online from the **18th of April 2023**. All applications must be submitted through the online portal via <https://submit.link/1x1>. Guidance on how to use the portal may be found on our website (www.khf.ie) and anyone interested in applying may sign up for a **Zoom information session on the KHF website on either the 25th of April at 10am and the 2nd of May at 1pm**. These 45 minute sessions will explain the application process, give you information on how to use the application portal and answer your questions. Applications may be completed on a computer, laptop, tablet or mobile phone. Enquiries will be dealt with **through email only to info@khf.ie**.

There are three phases to the application process. This is in recognition of the time and effort it takes for small organisations to complete funding applications:

PHASE 1

Expression of Interest submitted on the online portal.

This is a short process (approximately 30 minutes) that asks for your organisation information and brief information about your project. These Expressions of Interest will be assessed by a panel. Some organisations will be invited to submit a full application, while others will be notified that they do not meet the criteria.

PHASE 2

Completion of Application (for those invited to do so).

This will include the information provided in phase 1 in addition to requiring you to submit information on your budget, accounts, intended impact and examples of your work. It may take a little longer than the Expression of Interest (approximately 60 minutes). These completed applications will be assessed by a panel. All organisations will be notified of the outcome. Organisations seeking once-off funding will be notified at this stage as to whether or not they have been successful. Those who are on the final shortlist for potential selection as 3-year projects will be invited to phase 3.

PHASE 3

This will be a brief Zoom chat (approximately 25 minutes) with some of the assessment panel, to make sure we can partner with you for support, implementation and mutual learning over the 3-year period, to get to know you a bit better and to answer any questions you may have about the process. Following these calls, we will draft a final list of approved projects and notify all applicants.

It is expected that all projects will be notified of outcomes **by 30 June 2023** and we will organise for the transfer of funding soon after that. We expect to mark the awarding of the programme support with a celebratory event for all awardee organisations in September 2023.

Organisations may submit only one application to the fund. Projects should be in place by September 2023 (if new projects).

INELIGIBLE ACTIVITIES

The following categories are outside of the remit of the grants programme:

- Individuals, bursaries or scholarships.
- Medical expenses.
- Capital projects.
- Animal welfare activities.
- Commemorative structures.

BUDGET AND STAFFING

We understand that many projects require some staff input and this may be included in your budget. This might be some additional help to prepare and deliver the project. However, we would prefer not to fund core staff costs, as this may be a risk to organisational sustainability, due to the short timeframe for the grants programme. Staff costs will ideally not comprise more than 65% of your overall budget.

PRACTICAL APPLICATION ADVICE

- Take the time to sign-up for a Zoom information session on our website (www.khf.ie) and think about the questions you might like to ask.
- Download the application questions from our website (www.khf.ie) to help you in drafting your responses offline, before you begin your online application.
- If you have completed funding applications before, begin with what you know has worked before and build from there.
- Check your budgets and ensure they are realistic.
- Stay within the word count and consider inviting a 'critical friend' or colleague to review your draft.
- Submit all required documents.
- Keep a record of the email and password you used to complete your online application.
- Review all the information before you submit and ensure you do not miss the deadline.
- Good luck!

WHY APPLY

The KHF 'Children's Promise' grants programme will provide financial support and a network of supports for grantees. KHF aims to partner with grantee organisations so that we can work towards our shared vision of making Ireland a place in which all children can thrive, regardless of socio-economic background. We also expect it will provide valuable opportunities to work collaboratively with other funders and statutory organisations. Most importantly, we hope it will have tangible impact on the lives of vulnerable young children and their families and make your organisations and communities even stronger.
